Governor's budget included 51 recommendations for awards in HB5. HB5 was a consolidated bill which included multiple programs from multiple agencies, rather than each program having it's 'own' bill as had been done historically. Legislative process split HB5 up which resulted in having, at end of the session individual bills for each program.

HB11 includes 36 projects, which has funding for 33 projects, 3 remaining (*) will be funded if funding becomes available

Town of Sunburst withdrew a wastewater application during the Legislative session Greater Woods Bay Sewer District returned the award, \$750,000 which allowed contingently funded projects Conrad, and Flaxville to access the funds, \$500,000 & \$250,000 respectively

Projects with an asterisk * are contingently funded

Governor's budget included 29 projects for funding and 3 projects for contingent funding in HB 14. Initially, HB14 was a consolidated bill including multiple agency programs and new programs. The Legislative process split HB into several different bills proposing a variety of blends of funding and programs including opportunities to pass a bonding bill to fund projects. SB 367 and HB 645 were the main two bills considered with different options. By the end of the session, HB14 had been split into more traditional bills (HB11) and others to promote 'standard' program funding and SB367 and HB 645 adding bonding projects. HB645 and SB 367 did not make it out of the committees or House and Senate Floor sessions.

HB11 includes 38 projects, which has funding for 35 projects, 3 remaining (*) will be funded if funding becomes available

Town of Flaxville withdrew a wastewater application during the Legislative session

A Special Legislative session was held in November 2017. Budget Reductions in the special session impacted some projects authorized in HB11. Projects 17-26 infrastructure and 7-9 bridges had funding placed on hold. Projects numbered 16 infrastructure and 6 bridges had the award amount partially reduced. Bridge project 6 had funding fully restored with the recapture of funds from a completed project, infrastructure project 16 was partially restored as of October 2018. If additional funding becomes available, projects will be funded in order.
